Information on the Cookie Policy

What are cookies?

Cookies are packets of information sent by a web server (eg the site) to the user's Internet browser, which is automatically stored on the computer and automatically sent back to the server at each subsequent access to the site.

By default, almost all web browsers are set to automatically accept cookies.

Typically cookies can be installed:

- directly from the owner and / or manager of the website (so-called first-party cookies);
- by managers unrelated to the website visited by the user (so-called third-party cookies). Unless otherwise specified, please note that these cookies fall under the direct and exclusive responsibility of the manager himself. Further information on privacy and their use can be found directly on the websites of the respective operators.

This website may use, also in combination with each other, the following types of cookies classified according to the indications of the Privacy Guarantor and the Opinions issued in the European context by the Working Group pursuant to art. 29 of the GDPR:

- **Session**, are cookies that are not stored permanently on the user's computer and are deleted when the browser is closed, they are strictly limited to the transmission of session identifiers necessary to allow safe and efficient exploration of the site , avoiding recourse to other computer techniques potentially prejudicial to the confidentiality of users' browsing.
- **Persistent**, are the cookies that remain stored on the hard drive of the computer until their expiration or cancellation by users / visitors. Through persistent cookies, visitors who access the site (or any other users who use the same computer) are automatically recognized at each visit. Visitors can set the computer browser to accept / reject all cookies or display a warning whenever a cookie is proposed, in order to evaluate whether to accept it or not. The user can, however, change the default configuration and disable cookies (i.e. block them permanently), setting the highest protection level.
- **Technicians**, are the cookies used to authenticate, to take advantage of multimedia content such as flash player or to allow the choice of the navigation language. In general, it is therefore not necessary to obtain the user's prior and informed consent. This category also includes cookies used to statistically analyze accesses / visits to the site , only if used exclusively for statistical purposes and through the collection of information in aggregate form.
- **Non-technical**, they are all cookies used for profiling and marketing purposes. Their use on users' terminals is prohibited if they have not previously been adequately informed and have not given valid consent in this regard according to the opt- in technique . These types of cookies are, in turn, grouped according to the functions they perform in:

- **Analytics**, are cookies used to collect and analyze statistical information on accesses / visits to the website. In some cases, associated with other information such as the credentials entered for access to restricted areas (your e-mail address and password), they can be used to profile the user (personal habits, sites visited, downloaded content, types of interactions carried out, etc.).
 - **Web beacons**, this category includes snippets of code that allow a website to transfer or collect information through the request for a graphic image. Websites can use them for various purposes, such as the analysis of the use of websites, control and reporting on advertising and the personalization of advertising and content.
-

Cookies are present on Dick Trace's sites

Technical cookies :

1. **navigation or session cookies**, guarantee the normal navigation and use of the website (allowing, for example, authentication for access to restricted areas);
2. **functionality cookies**, allow the user to browse according to a series of selected criteria (for example, the language, the searches carried out) in order to improve the service provided.
